

## **Quality Policy**

Temco's Quality Policy has been developed to reflect the principles that are valued in our work. TEMCO's policy is to place an emphasis on exceptional work and safety practices, experience, expertise, capability, reliability and a high quality of work.

Temco maintains a commitment towards our quality objectives by meeting conformance of work to all quality, contract, safety, regulatory and statutory requirements, and that a consistent and uniform control of these requirements is met.

Employees are given the freedom and responsibility to identify problems and suggest solutions to resolve any non-conformance in our work practises.

This Quality Policy is essential in ensuring the long term success of Temco in a competitive market place, and to achieve the satisfaction of both our clients and our employees. Temco will strive for continuous improvement in our quality and work practises.

To maintain this policy ISO 9001:2008 is adopted as the Quality Management Standard for Temco, and Temco will strive for continuous improvement of the Policy and its systems to achieve a high standard of quality within our work.
